I. Introduction/Interviewer Instructions

This interview is designed to assess the readiness, current operations, budget, skills, and technology awareness of Manila Manufacturing Corporation (MMC) for the possible adoption of emerging technologies. This interview will highlight the following:

- Artificial Intelligence (AI)
- Augmented Reality (AR)
- Machine Learning
- Quantum Computing
- Internet of Things (IoT)
- Big Data Analytics
- Cloud Computing

The information gathered for the interview will be used to understand MMC's needs and will be used for making recommendations which emerging technologies will be helpful for the company.

Interviewer Instruction

Before starting the interview, the interviewer should:

- Introduce themselves and explain the purpose of the interview.
- Explain the questions about MMC's current operations and possible use of emerging technologies.

- Ask the question clearly and give the interviewee enough time to answer.
- Ask the follow-up questions if needed for additional information.
- Record the interviewee's answer and the important points in the note section.
- Keep the interview professional and respectful.
- Thank the interviewee after the interview.

II. Interviewee Information

This section collects the basic information of the person being interviewed. The information will help to classify the interviewee's position, department, and experience to the company.

Interviewee Name:	
Position/Job Title:	
Department:	
Years at MMC:	
Interviewer Name:	
Date of Interview:	
Type of Interview (On-site or Online):	

III. Background and Current State

This section focuses on MMC's operations, existing technologies, and problems that employees experience in everyday work. The answer will help identify areas where technology may be useful.

1. How would you describe the current operations of MMC?

Notes/Response:

2. What system or technologies is currently being used in your department?

Notes/Response:

3. What part of your work is still done manually?

Notes/Response:

4. What are the biggest problems or challenges you experienced in your daily operation?

Probe: Can you give an example?

Notes/Response:

5. Which process in MMC needs the most improvement?

Probe: Why do you think it needs improvement?

Notes/Response:

\

IV. Technology Awareness and Readiness

This section aims to find out how familiar and prepared MMC is with adopting emerging technologies.

6. How familiar are you with emerging technologies?

- ☐ Very familiar
- ☐ Familiar
- ☐ Somewhat familiar
- ☐ Not familiar

Notes/Response:

7. What emerging technologies have you heard or seen being used by other incorporations/companies?

Notes/Response:

8. Does MMC consider using emerging technologies?

- ☐ Yes
- ☐ No
- ☐ Not sure

Probe: If yes, what technology is considered?

Notes/Response:

---

9. What challenges might employees or management have about adopting new technologies?

Probe: With those challenges, how should it be addressed?

Notes/Response:

V. Industry and Competitive Analysis

This section's goal is to identify the possible advantages of keeping up with emerging technologies.

10. What changes in technology have you noticed in the manufacturing industry?

Notes/Response:

11. Do you believe that MMC will be able to persist with other manufacturing companies with the help of emerging technologies?

- ☐ Yes
- ☐ No
- ☐ Not sure

Probe: If yes, how?

Notes/Response:

12. What advantages do you think MMC could get from utilizing emerging technologies?

Notes/Response:

13. What do you think could happen to MMC if it does not adapt to technological advancements?

Probe: Can you explain your answer?

Notes/Response:

VI. Specific Technology Areas

This section discusses the different emerging technologies. The questions are intended to find which technologies may be useful for MMC and how they could possibly be applied to the company's operations.

A. Artificial Intelligence (AI)

This part asks about the benefits of AI to MMC when it adopts emerging technologies

14. What potential benefits do you see for MMC's operations from artificial intelligence?

Probe: Can you explain your answer?

Notes/Response:

B. Machine Learning

This part focuses on how learning from data and past experiences could potentially help MMC improve its processes and decisions.

15. Do you think Machine Learning could be useful for MMC?

☐ Yes

☐ No

☐ Not sure

Probe: What process could benefit from it?

Notes/Response:

---

16. Are there any decisions or tasks at MMC learning from previous data or experience could be helpful?

☐ Yes

☐ No

☐ Not sure

Probe: How could it be helpful?

Notes/Response:

C. Augmented Reality (AR)

This part looks at how AR could help employees by providing information while they are performing tasks such as warehouse work and repairs.

17. Do you consider Augmented Reality could help employees with warehouse work and repairs?

- ☐ Yes
- ☐ No
- ☐ Not sure

Probe: How can it help employees?

Notes/Response:

D. Internet of Things (IoT)

This part focuses on connected machines, equipment, and sensors.

18. Which MMC devices, machinery, or other items would benefit from an Internet connection?

Notes/Response:

E. Cloud Computing

This part looks at MMC's current use of cloud-based services and the possible benefits and concerns of using cloud computing.

19. Does MMC currently use cloud-based services?

- ☐ Yes
- ☐ No
- ☐ Not sure

Notes/Response:

---

20. What do you think would be the benefits of using cloud computing in MMC?

Probe: Can you explain your answer?

Notes/Response:

F. Big Data Analytics

This part focuses on the data MMC collects and how analyzing large set of data could help the company find useful information and make better decisions.

21. What types of information does MMC currently gather from its clients or operations?

Notes/Response:

---

22. How could identifying a large set of data help MMC make better decisions?

Probe: What information would be useful for the company to find?

Notes/Response:

G. Quantum Computing

This part asks about MMC's awareness of quantum computing and whether the company sees possible future uses for it.

23. Have you ever heard of Quantum Computing before?

☐ Yes

☐ No

Notes/Response:

---

24. Do you think Quantum Computing could be useful to MMC in the future?

☐ Yes

☐ No

☐ Not sure

Probe: Why do you think so?

Notes/Response:

VII. Skills and Capacity

This section focuses on the skills and training that MMC employees currently have and what additional skills may be needed to be able to use emerging technologies.

25. What technology-related skills do MMC employees currently have?

Notes/Response:

---

26. What skills or training would employees need before MMC could start using new technologies?

Probe: What kind of training would be most helpful?

Notes/Response:

VIII. Budget and Implementation

This section looks at the resources MMC may need before adopting an emerging technology.

27. What do you think MMC should consider when deciding whether to invest in an emerging technology?

Probe: Would budget, equipment, employee skills, or other factors affect the decision?

Notes/Response:

28**.** What do you think would be the biggest challenge MMC could face when implementing an emerging technology?

Probe: How could MMC prepare for or deal with this challenge?

Notes/Response:

IX. Closing

Thank you for participating in this interview. Your answer and explanation will be used to understand MMC's current situation, challenges, and readiness for adopting emerging technologies.

The information gathered will be used as a basis for developing recommendations that may help MMC improve its operations and prepare for future technology adoption.
